

Quality Garden Furniture

Welcome to the top quality selection of Pine garden furniture from Anchor Fast, offering style, durability and value for money.

Anchor Fast – For Quality Outdoor Furniture

At Anchor Fast, we specialise in the design and manufacture of fine outdoor furniture. With years of experience, we have built a reputation for the quality of our products and the high standards of service we offer throughout. It means you can talk to Anchor Fast with complete confidence.

Sustainable, Renewable FSC Timber Sources

As a major manufacturer, we make sure that the timbers we use for our products are from a sustainable and renewable FSC/Pan European Forestry Commission (PEFC) managed forest. We source our timbers from the north of Sweden. Here, the colder temperatures mean the timber takes longer to grow, which makes it denser and enhances the quality of the finished product. We also use only water-based preservatives rather than potentially harmful solvents.

A Service Designed With You In Mind

Because all our products are manufactured in our factory in Doncaster, you can enjoy real flexibility when it comes to what you need and when you need it. We provide delivery across the UK mainland with a fast turnaround helping you manage your own stock control. As our products invariably go to your customers in their original packaging, they are very well boxed to offer real protection and to reflect the quality of the furniture.

Stylish In The Garden

The Anchor Fast selection of outdoor furniture meets a wide range of needs, tastes and budgets. It provides a special charm, whether for relaxing or dining or simply for an eye-catching decorative appeal. Please take a minute to find out more about it...

Somerset Picnic Benches
